

SPLINTER HILL BOG

Splinter Hill Bog in Baldwin County consists of 2 acquisitions (Nos. 30 and 40) covering 627 acres of longleaf pine and bog habitat, at the headwaters of the Perdido River. The tract is being managed as a Nature Preserve to forward the conservation of these rare natural communities.

Adjacent to the Splinter Hill Bog acquisitions are 3 tracts owned by ADCNR's State Lands Division. These tracts are cooperatively managed in conjunction with the Forever Wild acquisitions to benefit habitat and recreation.

Recreational opportunities on the tract include hiking, hunting, wildlife observation and biking.

Directions:

From I-65, take exit 45 (Perdido/Rabun). Take Baldwin County Road 47 West approximately 1.3 miles to the parking lot on the right or travel 0.1 miles to Splinter Hill Road. Turn right on Splinter Hill Road and travel approximately 0.4 miles to the parking lot on the left across from Turberville Lane.

Delaware Skipper

Alabama is ranked 3rd in the nation for Reptile and Amphibian diversity, with approximately 160 species.

Pinewoods Treefrog

White-topped Pitcherplants (*Sarracenia leucophylla*) occur in bogs in the southernmost counties in Alabama. Pitcherplants are carnivorous, feeding on insects, and rarely other small organisms, that get trapped inside the pitcher.

Common Wood Nymph
